

# Health and Movement

Learning Objective:

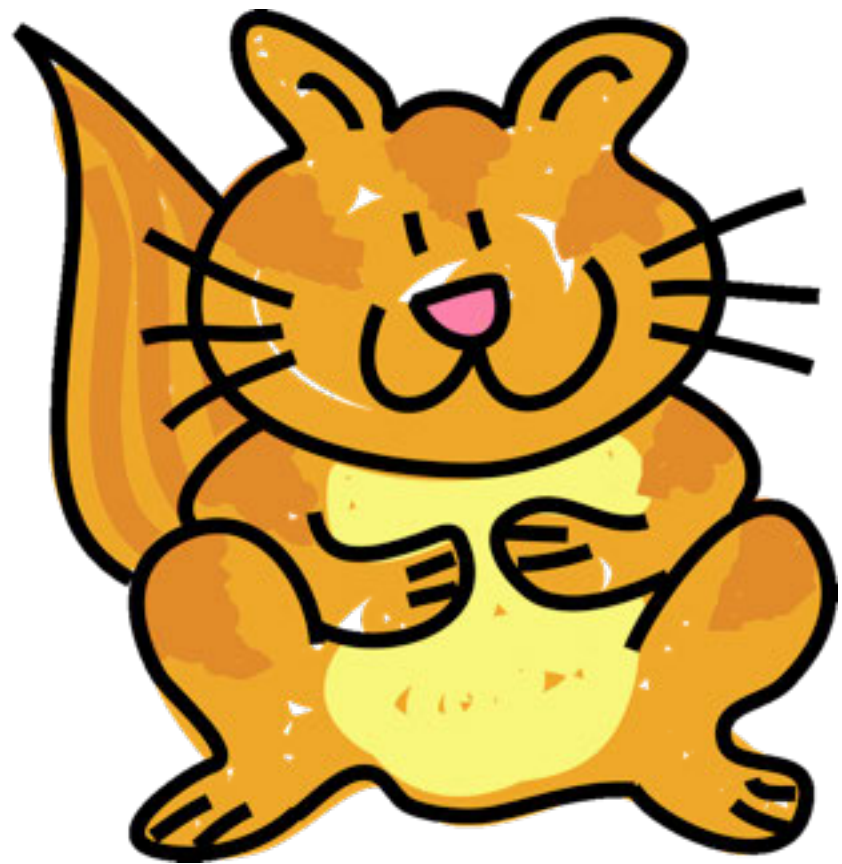

To carry out an investigation to find out what pets eat.

Do you have a pet at home?

What does your pet eat?

Do all cats eat  
the same food?

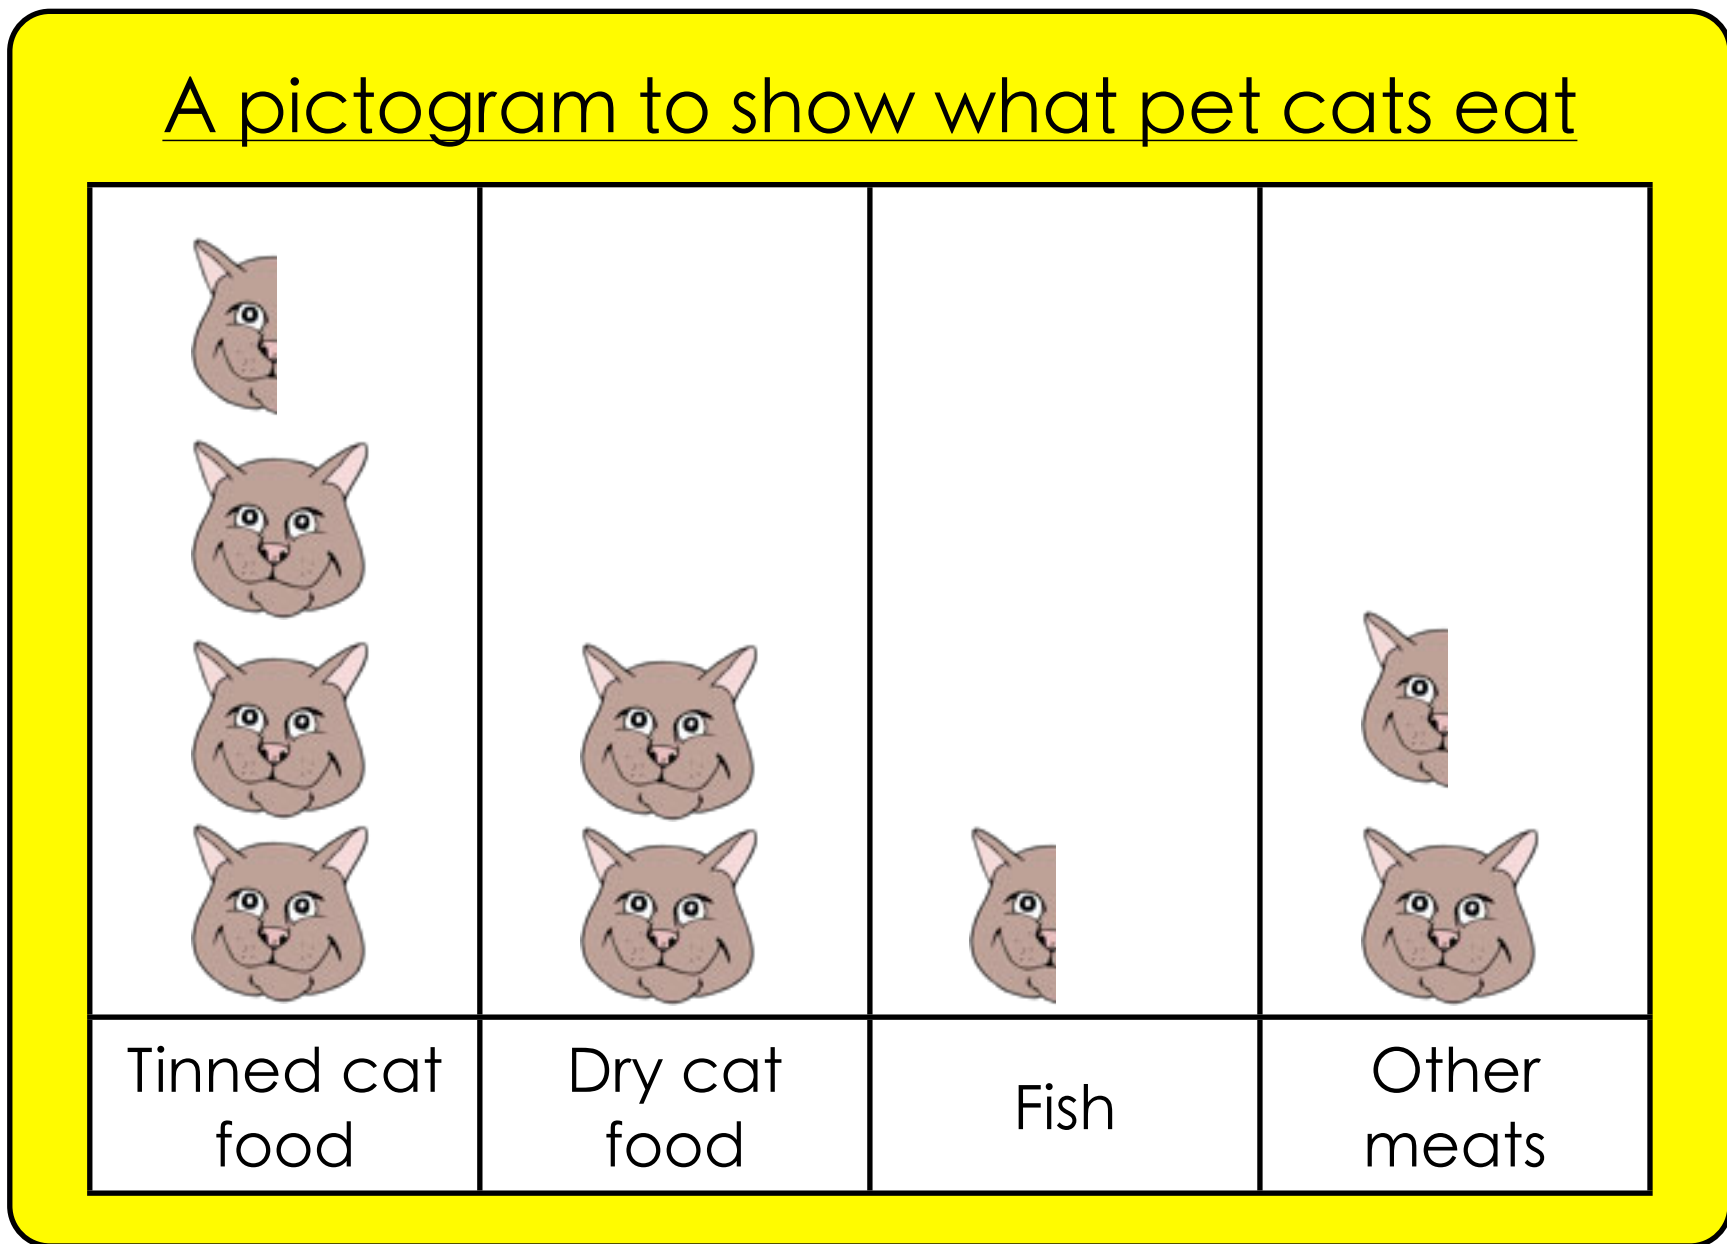

How could we find  
the answer to this  
question?

What information would  
we need and how would  
we gather it?

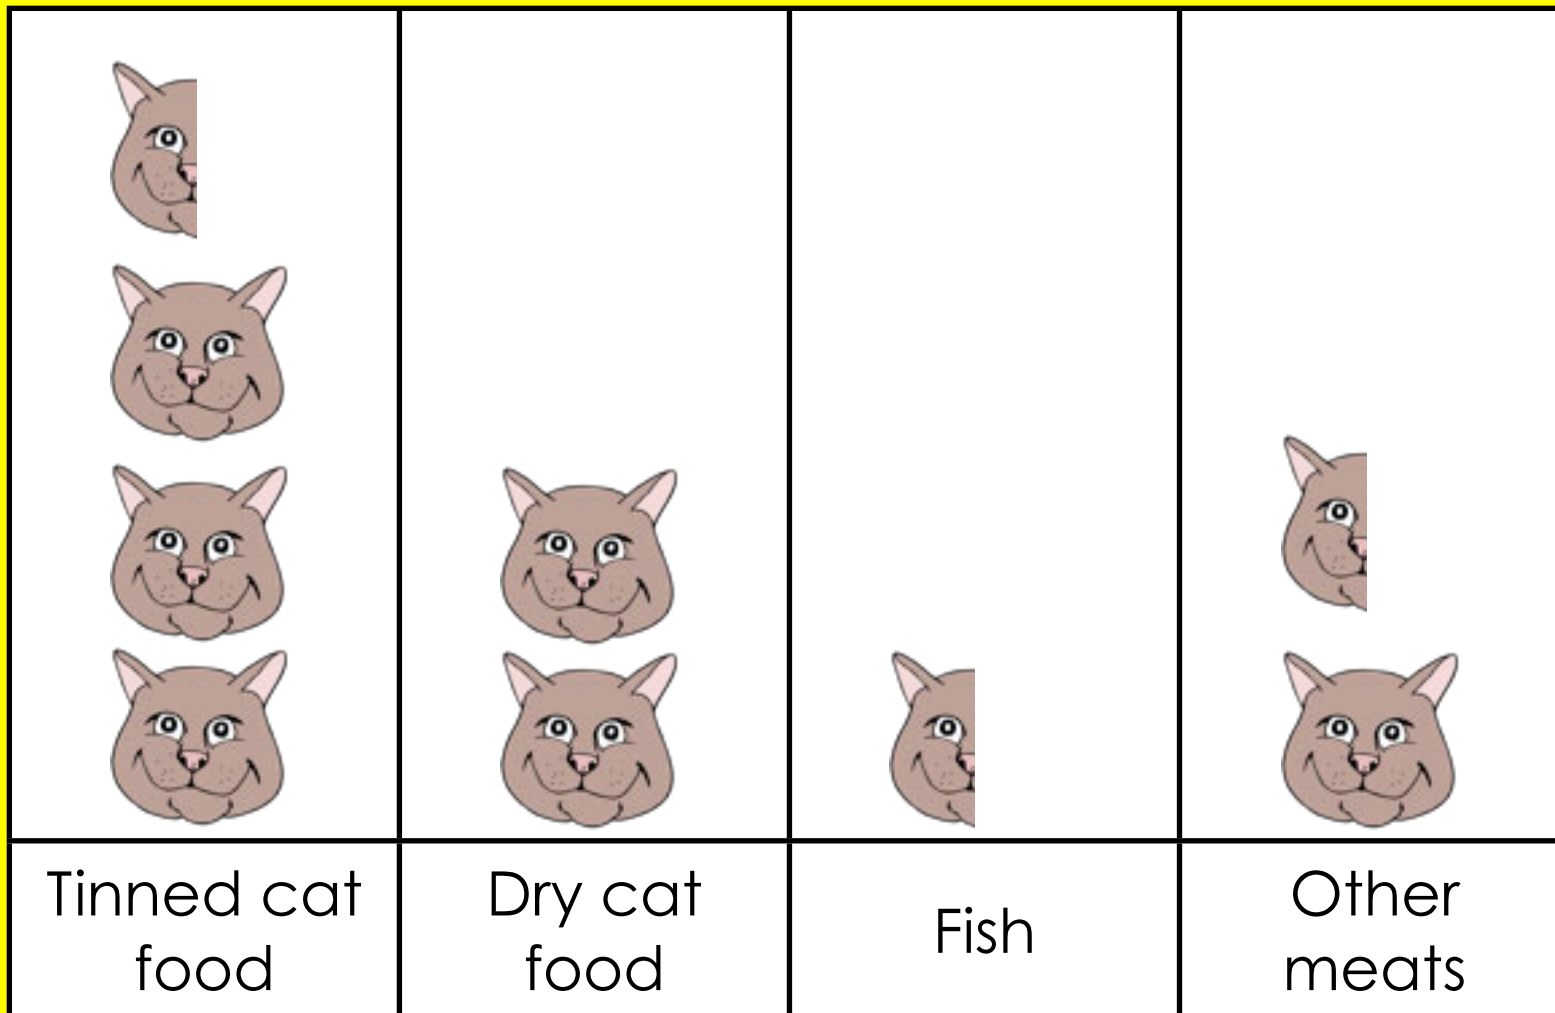

15 cat owners were asked what kind of food their cats ate. The results were recorded as a tally chart and then turned into a pictogram.

Tinned cat food	<del>    </del>
Dry cat food	
Fish	
Other meats	

 = 2 cats

A pictogram to show what pet cats eat

What do these results show you?

How accurate do you think these results are?

Today you will be asking and investigating a question to find out what pets eat. What questions could we ask?

Questions we could investigate:
